

Leisy Sánchez Doria

Fullstack Developer

+57 3016385176 | leisysado@gmail.com | [LinkedIn](#) | [GitHub](#)

Barranquilla, Colombia

Software Developer specialized in backend technologies with Python (FastAPI, Django, Serverless), TypeScript (Express), and Rust. I have hands-on experience in frontend development with React, and in cybersecurity, specifically focusing on Abstract Syntax Tree (AST) analysis, multi-language code interpretation, and building solutions that integrate AI models. Additionally, I have worked with AWS cloud architectures and both SQL and MongoDB databases, delivering scalable, efficient, and secure solutions.

WORK EXPERIENCE

Puntola

July 2025 - December 2025

Backend Developer Freelance

- Integrated automation workflows by connecting the application with Telegram bots, n8n orchestrations, and Google Sheets via Apps Script, achieving real-time data synchronization and reporting.
- Developed and maintained the backend of a financial application focused on transactions and remittances, utilizing Rust and TypeScript as the core language

Autonomic Mind

December 2024 - August 2025

Security Developer

- Developed a web application for software vulnerability management within the platform. Contributed to both frontend and backend development using Python (Django), TypeScript (React), GraphQL, AWS, and SQL.
- Built graphs utilizing CVSS documentation for a CLI tool designed to detect security vulnerabilities in source code across multiple languages—including Java, Go, C, C++, C#, Rust, Ruby, Python, and JavaScript/TypeScript—developed in Python.

Red5G

January 2022 - December 2024

Backend Developer

- Developed and maintained the backend of a financial web application focused on credit and lending systems, utilizing Python as the primary language.
- Utilized native cloud services including SNS, S3, and SQS, applying an MVC architecture to ensure system scalability and reliability.
- Automated credit reporting and disbursement workflow monitoring, significantly improving data traceability and control using DynamoDB.
- Reduced batch data insertion and report generation times from approximately 1 hour to a matter of seconds, significantly optimizing overall system performance.

Procaps

July 2021 - December 2021

Intern

- Automated an application to perform statistical calculations for pharmaceutical production and dynamically generate compliance reports, leveraging VBA (Visual Basic for Applications) across Microsoft Excel and Microsoft Word.

EDUCATION

Generation, Full Stack Developer Java	02/2026 - 06/2026
Universidad del Atlántico, Chemical Engineering	01/2016 - 12/2023
Universidad de Antioquia, Web Developer	03/2021 - 12/2021

PROJECTS

Energy Characterization Report at Granos y Cereales de Colombia S.A.	02/2022 - 06/2023
Full-Stack Developer	

Developed the *end-to-end* application to optimize energy consumption in the production plant, within a collaborative project with UNIDO, UPME, and the Colombian Ministry of Energy. The platform's innovation and efficiency led to winning the prestigious Rebecca Uribe Bone Award.

SKILLS

- Python, Django, MySQL, PostgreSQL, Git, Serverless, FastAPI, AWS, Office, Linux, JIRA, Rust, C++, React, TypeScript, n8n, Express, Power BI, GraphQL, RabbitMQ, Docker

LANGUAGES

- English (B1+)
- Spanish (Mother Tongue)
